## Technical Specifications

TS Series Interactive Whiteboard	TS/TSL 610	TS 810
A (H X W)	1210mm x 1700mm (47.7" x 67.0")	1210mm x 2460mm (47.7" x 97.0")
B (H X W)	1090mm x 1650mm (43.0" x 65.0")	1090mm x 2410mm (43.0" x 95.0")
C (Diagonal)	1976mm (77.8")	2649mm (104.3")
D (Depth)	76.2mm (3.0")	76.2mm (3.0")
Resolution	8000 x 8000	8000 x 8000
Weight	24.97kg (55 lb)	31.78kg (70 lb)
Lightning Technology	Yes	No
RoHS	Yes	Yes
Connection	USB	USB

### Surface Material

- Touch-sensitive, low-glare, stain-resistant, and projection-optimized Teflon surface

### Power Requirements

- TS 610, TSL 610, TS 810: USB powered

### Certification

- CE, FCC Class A, RoHS

### Webster Software Features

- Transfer images via drag and drop, clipboard, or file export
- Anti-aliased markup including highlighters
- Real-time playback
- Multiple monitor support
- Window shade and spotlight
- Save images in JPG, BMP, TIFF, WMF, HTM, PDF, PCT, MacPaint, PSD, PNG, QuickTime Image, and TGA

### Accessories (Included)

- Webster software on CD-ROM
- One 830mm (3.25") round eraser
- TS 610, TSL 610, TS 810: 5m (15') USB cable
- Stylus
- User Guide

### Recommended Computer Requirements

#### Microsoft® Windows:

- Windows 98, SE, 2000, ME, XP, or Vista®
- 256 MB RAM
- TS/TSL 410, 610, 810: One USB port

#### Apple® Macintosh:

- Power PC or Intel processor
- Mac OS 10.2 or higher
- 256 MB RAM (higher screen resolutions require more memory)
- TS 610, TSL 610, TS 810: One USB port

### Warranty

- Two-year limited warranty, free upgrade to five years upon product registration
- United Kingdom: 3 year on site warranty  
Warranty Support Line: 0870 112 7659

### Options

- TS 610, TSL 610, TS 810: Mobile Adjustable Height Stand (MS Series)

Simple. Effective. Extraordinary.  
The way communication should be.

## Interactive Whiteboard

### Engage Students in an Interactive Learning Environment

Designed for the classroom, the TS Series Interactive Whiteboard keeps students engaged at every level. When used with dry-erase markers, the TS Series captures every lesson, sketch, or homework assignment on the board. Add a projector and it provides an interactive touch-sensitive surface to open web pages, highlight lessons, and interact with graphics software using your finger or the stylus.

### Complete Interactivity

Ideal for teachers who enjoy interacting with a software-based interactive whiteboard, the TS Series provides all the features you expect at a competitive price.

The TS Series comes standard with Webster® software and allows you to capture your dry-erase work directly into the application. Webster software allows you to mark up applications, highlight text, use a window shade or spotlight during your presentation, as well as replay any lesson in real time.

### Software-free option available!

The TS Series Interactive Whiteboard can also be operated with the easy to use PolyVision Driver™, which is freely downloadable from the PolyVision website.

This driver offers a choice of multiple languages and is as easy to install as a printer. The user does not need to become familiar with specific application software. The TS Interactive board becomes a simple extension of the computer screen and the user can continue to use all applications he/she already knows. The icon strip becomes an easy to use presentation control bar.

### Easy to Use

Large, easy-to-use touch icons along the side of the whiteboard invite teachers and students alike to interact. The most commonly used features can be controlled with the icons to eliminate trips back to the computer. Change pen colour, make a snapshot, advance slides, erase the content, or print a copy instantly.

### Features and Benefits

- User friendly – control and mark up any projected image using your finger or stylus
- Capture and save – use any dry-erase markers to capture writing or drawings in four colours
- USB interface – allows a wide range of equipment to be connected to your TS Series whiteboard without unsightly cabling
- NetMeeting® integration – enables users to collaborate in pairs or groups over the internet or intranet
- Two-year warranty, extendable to five years with online registration
- Meets stringent European RoHS (Reduction of Hazardous Substances) standards

### Wide Compatibility

The TS Series is compatible with the latest Windows® and Macintosh® computers and provides identical functionality on either platform. Use markers, project, and capture notes instantly, allowing students to listen and engage in discussions, rather than taking notes. Control, mark up, and capture virtually any software application, then publish your captures on the web. Create web pages with your content directly from the software.

### Designed for Durability and Safety

Backed by our best warranty, the resilient Teflon®-coated surface provides utmost durability, as well as the lowest gloss of any interactive whiteboard available to provide glare-free projection. The plastic frame is designed to flex so it stands up to the rigors of any foundation to senior school classroom. In addition, since no marker holder or special stylus is required to operate the whiteboard, it can't get lost or stolen.

### Calibration-Free Technology

The TS 610 Interactive Whiteboard is available with the patented, calibration-free Lightning™ technology. One press of the projection icon instantly realigns the projected image on the whiteboard if the projector is moved, eliminating the need to perform the traditional, time-consuming calibration process. This feature reduces calls to your help desk, as well as interruptions to your work flow.

### Maximize Your Projection Space

Specially designed to take advantage of the latest wide format (16:9) projectors, the TS 810 Interactive Whiteboard offers the largest writing surface available, 2400mm (a full eight feet) wide.

### Increase Your Mobility

Optimize your projection space by adding a mobile stand to your TS(L) 610 Interactive Whiteboard. The mobile stand features large wheels allowing greater flexibility. Share one TS Series between two classrooms or rearrange your classroom for break-out discussions.

### Comprehensive Classroom Solution

PolyVision offers professional development programs that can be customized to the individual needs of the school, goals, and academic requirements.
